

Change the Start Button style in Start Menu Reviver 2

Want to change the Start Button style in Start Menu Reviver? The good news is that you have over 10 to choose from. Here is how to change it.

Video Transcript:

Hi guys, Mark here from ReviverSoft. Today I'm going to teach you how to change the Start Menu Reviver to start button. Right now this is the default start button, you use in Start Menu Reviver, we use it because it's unique. Right away people know that this is the Start Menu Reviver. If you wish to change that, it's quite easy to do. If you can just click on the button to open Start Menu Reviver, we need to select settings, and start menu settings and then go to start menu.

Then there's an option here that says start menu button style. You can see this is style number 11, but there are 10 other styles here, all of which you can choose to use. If you like to choose to have kind of more traditional style which is I guess Windows like, you can choose that one and just save your option there. Right there you can see that the option has changed for the button.

You can select the different one if you wish, go back to the start menu settings and then say choose start number one, and then there you go, let's change again. They all have a different hover state. When you move your mouse over them, they change color or they interact with your mouse, but really you can choose one of any of the 11 styles that we have there. If you wish to see more styles, please leave a comment below, we love feedback and we like to try an improvement product if people think there's ways that we can improve through changing the design and new feature.

Hope to see you in the future video, and thanks for using Start Menu Reviver.
