

## Top 5 Things to Know about Registry Reviver

After purchasing Registry Reviver, you'll notice it does a great job of cleaning your Windows Registry. That's not all that our product offers, though. We'd like to show you a short top 5 list of what you need to know about Registry Reviver.

1.

### Customize Your Scan

Click the **Scan (magnifying glass)** icon. You can determine which areas of your Windows registry will be scanned for errors. Notice that **Deep Scan** is deselected by default. Try selecting it, and you'll get a much more thorough scan, though it will take longer.

Customize Your Scan

2.

### Startup Manager

Click the **Utilities (wrench)** icon. Then, click the **Startup Manager** tab. You'll notice numerous Windows startup programs that you can deselect, if you definitely don't want those programs to start up when Windows does. Click **Save Changes** and restart your PC for a startup speed boost!

3.

## Registry Optimizer

Click the **Utilities (wrench)** icon. Click the **Registry Optimizer** tab. Click the **Optimize Now** button, which will optimize and defrag your Windows registry. This is a great occasional step to run in between scans.

4.

## Scheduler

Click the **Utilities (wrench)** icon. Click the **Schedule** tab. Choose whether you want to run the scheduled scan once, every day, every week, or not at all. Then, choose a date and time, or a day of the week, then click **Apply** to set up your scheduled scan.

5.

## Restore Deleted Entries

Click the **Options (gear)** icon. Click the **Restore** tab. If you're running into issues and there are any Partial Backups listed, you can click one of them and click **Restore Selected Backup**. This will bring your Windows Registry back to its previous state. You can also click **Restore to Original Settings** to bring your registry back to the state before the first time you optimized your registry.
